

# ORAP® Analytics Portal

## NEW Equipment Group Categorizations in RAM Analytics

For those of you using the ORAP Analytics Portal, we have introduced new filtering capability for "Equipment Groups" in the right filter choices. This new option will only apply when you are viewing the Equipment/RAM KPIs, Operations, or Downtime Dashboards.

We have streamlined the choices in a "tree hierarchy" to help you better select the equipment you want to see data on. In the example to the left, the screenshot shows what you will see if you are a Aeroderivative Gas Turbine plant in Combined Cycle application. Under "Simple Cycle Plant" you will have

the Package & Driven Equipment and the Station Equipment as subcategories. Under Package & Driven Equipment is the Gas Turbine, Package, Generator and the Centrifugal Compressor (if applicable).

Similarly, you will have drop down choices under both "HRSG Plant" and "Steam Turbine Plant". You also have the choice to exclude or include Outside Management Control Events in your KPIs.

Peer Group(s)

Equipment Group(s) **SELECT ALL**

Search

- Simple Cycle Plant
- HRSG Plant
- Steam Turbine Plant
- Outside Management Control

Equipment Group(s) **SELECT ALL**

Search

- Simple Cycle Plant
  - Package & Driven Equipment
    - Gas Turbine
      - Engine
      - Power Turbine
    - Package
    - Generator
    - Centrifugal Compressor
  - Station Equipment
- HRSG Plant

Equipment Group(s) **SELECT ALL**

Search

- Simple Cycle Plant
- HRSG Plant
  - HRSG
  - Feedwater (HRSG)
  - Station Equipment (HRSG)
- Steam Turbine Plant
  - Steam Turbine & Driven Equipment
  - Station Equipment (ST)
  - Outside Management Control

It is important that ORAP has your most up-to-date configuration (pedigree) details in the system to ensure that we are providing you with the correct Equipment Groupings. If you see changes that need to be made, or if you have any questions, please email us at any time at [service&solutionsdesk@spsinc.com](mailto:service&solutionsdesk@spsinc.com).
