

# ORAP® Analytics Portal - NEW DASHBOARD

## Component Downtime Listing

Building upon feedback from you, our ORAP customers, we are introducing a NEW Component Downtime Listing dashboard in the ORAP Analytics Portal. This new dashboard will be very similar to Section 3 - Equipment Trends - Component Downtime that is available in the PDF ORAP Customer Reports.

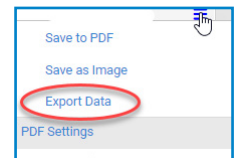

To access this new report, go to "Equipment/Downtime/Component Downtime" in the ORAP Analytics Portal.

After you have chosen your Filters and hit apply, results similar to the screen below will be visible to you.

This dashboard provides a summary of Events in ORAP, both by the number of hours and incidents, experienced by your Plant versus your selected Peer Group. You will notice that the report is sorted first by the "Total Hours My Units" column and then by the "Total Hours Peer Group" column. This report can be easily exported to Microsoft Excel using the hamburger menu at the top of the screen and then by clicking on "Export Data."

The goal of this dashboard is to show you how your Events compare to the Events happening in the fleet, while also showing you outages that are happening that you have not experienced.

If you have any questions, please email us at [service&solutionsdesk@spsinc.com](mailto:service&solutionsdesk@spsinc.com).

COMPONENT DOWNTIME											
Major System	System	Component Group	Component	Units Reporting Outages My Units	Total Hours My Units	Total Events My Units	Avg Hrs per Event My Units	Units Reporting Outages Peer Group	Total Hours Peer Group	Total Events Peer Group	Avg Hrs per Event Peer Group
Aeroderivative	Combustion	Burners and Nozzles Annular	Fuel Nozzles	1	24.53	1	24.53	1	24.53	1	24.53
Aeroderivative	Gas Fuel	Piping	Flexible Piping (Hose) - Gas Fuel (GG)	1	1.8	1	1.8	2	3.42	2	1.71
