FOR IMMEDIATE RELEASE

Strategic Power Systems, Inc. Announces Organizational Changes to Drive Strategic Growth and Strengthen Value in the Market

Charlotte, North Carolina – March 24, 2026

Strategic Power Systems, Inc.® (SPS), is announcing a business restructuring to improve operational efficiency, accelerate growth project initiatives, while strengthening leadership alignment across the company.

Effective 1 January 2026, SPS has implemented a revised management framework designed to streamline reporting lines, clarify leadership responsibilities, and better position the organization to respond to the rapidly evolving conditions in the energy market.

As part of this revised structure, SPS is pleased to announce:

- Thomas Christiansen has been appointed Chief Operating Officer (COO) where he will lead the execution and delivery of the ORAP® family of products and services to a global customer base, and he will oversee all existing and future contractual relationships within SPS. In this role Tom will be responsible for all internal operational teams ensuring alignment with a focus on the highest level of customer service delivery.
- Tripp DellaVilla will transition to the role of Chief Financial Officer (CFO) focused on delivering financial discipline and readiness to support the investment requirements associated with moving SPS to an AI driven business to support each of our customers' needs for predictive data analytics, meeting the challenges of a changing market.
- David A. Doctor and Andrew-Hutson Smith have joined the SPS team with a focus on Strategic Sales. David and Andrew will help address and manage SPS' strategic growth and future opportunities, driven by the use of AI within the ORAP system using advanced ML and other AI analytical techniques, as well as promoting the use of ORAP Data Fusion® in the market. David has for four decades built and led companies and organizations engaged with the power generation industry. Andrew most recently was the General Manager of a Rolls Royce subsidiary responsible for delivering digital transformation solutions for the aeronautics turbine industry.

“These changes reflect our commitment to building a more agile and customer focused organization,” said Salvatore A. DellaVilla, Founder and CEO of SPS. “By aligning our leadership structure with our long-term

commitment to our unique value in the market based on ORAP, we are strengthening our ability to deliver value to our customers, partners, and stakeholders each and every day.”

###

About Strategic Power Systems, Inc.

SPS’ philosophy is Data First. Data is what we do. We are experts in the field of data collection, validation, analysis, and benchmarking of power plant performance across various technologies. We provide key performance metrics or (KPIs), following industry standards, to power plant owners, operators, Original Equipment Manufacturers (OEMs) and other industry stakeholders through the Operational Reliability Analysis Program (ORAP®). This information allows them to make informed business decisions relating to the performance and operational readiness of their equipment. There is no system in the world that collects power plant data in such a comprehensive way as ORAP. Visit us at www.spsinc.com for more information.
